

Why Use a Mobile Wallet?

Convenience

Completing a transaction is as easy as a tap of a smartwatch or a wave of a smartphone.

Efficiency

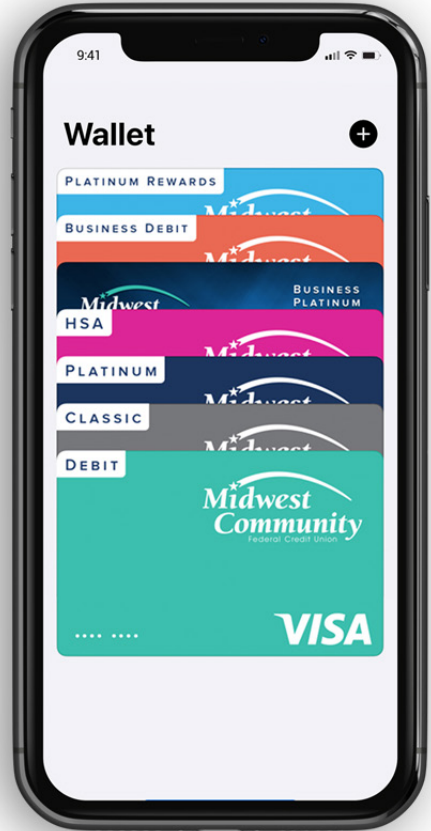

No digging in your wallet or purse for the right card. Your phone is always with you (you may not have to carry a wallet or purse with you).

Organization

Digital wallets help organize credit cards, debit cards, tickets to movies, airlines, even theme parks.

Enhanced Security

Unlike a regular wallet or purse, your phone has security features such as passwords, fingerprints, and facial recognition to allow access to forms of payments. When payments are made in-store or online, what is exchanged is a unique transaction identifier (also known as a token) instead of your card number. Stores will not have to store your account information.

Midwest Community VISA® cards are supported by your favorite mobile wallet options. Learn more on our website at <https://www.midwestcommunity.org/personal-banking/mobile-banking/>
